

Actors: Visitor, User, Agent, Admin,

Visitor: Does not have an account. Can only browse through the events and view agent pages.

1. **USER:** a person that goals to attend events on the website

- Login: every user has to log in to their user account by entering their correct email and password that will match in the system database to be able to send requests to attend any event or send messages to agents.
- Sign up: requires name, surname, email, and verification from the email after a password is chosen last.
- Forgot password/reset password: If the users are unable to log in to their account, they can choose the forgot password option. The system will send a code via email or sms, which will include a code. After the user enters this code, they can generate a new password to log in. If the user wants to change their password, they can reset their password in user profile settings.
- Filter events: Users can filter the events by date, location, sport type, and free options.
- Sorting events: Users can sort the events by: most popular, old to new, new to old, cost low to high, cost high to low.
- View events: to view events on the website, no login or signup is required.
- View agent pages: to view agent pages, no login or signup is required. Users can see the total number of events the agents have created, since when they have been agents, how many members they have, active events, total number of events created successfully.
- Request: Sending a request to register for any event.
- Get notifications: reminders about how much day left until the registered event, cancellation of the event, possible changes related to the registered event, warning about an event added to the favourites section that the quota is almost full, whether registered into the event successfully, user being accepted to become a member of the requested association, payment done successfully, membership is about to expire, new messages, system update, request rejection to attend an event. Users can manage notification preferences.
- Requesting to become a member of an association: to become a member of an association, the user must send a request to the association. The association decides after whether to accept the user as a member or not. After the user is accepted to become a member of the association, the user pays a monthly fee set by the association.
- Updating membership: Once a user has been accepted as a member of that agent, they don't have to send a request each month. They can just update

their membership by simply paying the monthly membership cost either manually or automatic by option.

- Cancellation of membership: Users can cancel their membership anytime but can only receive a refund if they have cancelled their membership within 24 hours after applying.
- Payment: Payment is done online via card. Each application cost is different as the agent sets the amount individually for each event and membership. Users can see the payment status as pending, completed or failed.
- Refund/Cancellation from event: Users are allowed to ask for a %50 refund only if there are less than 24 hours until the event starts, and a full refund if there are more than 24 hours until the event begins when they cancel their participation. If an event is cancelled, the users will receive a full refund regardless of the cancellation time.
- Search: Users are allowed to search for any event or agent.
- Send feedback: Users can send feedback to admins.
- Sending messages: users can start a chat to send messages to agents to get further information about the events.
- Request to message with admin: Users can send a request to chat with an admin.
- Favourites: Users can view the events they previously added to favourites so they can access them easily.
- Previously attended events: the user can view the events they have attended before, and after the event has finished.
- Sending reviews: Users can only rate the events they have attended. Either out of five or give short feedback to agents about the event for future improvements.
- Dashboard: Applied events, Active memberships, Transaction history.
- Report: users can report events, agent accounts to admin.
- Documents: Some events may require certain documents to attend. Users can upload these documents so the agent can check if the user is qualified to attend the event before approving their request to apply that event.
- Viewing agent page: users can see the about, events created by that agent, contact info, etc. On agent page. Also, this is where users can apply to become a member if an agent is an association.
- Reviews: reviews made by other users can not be seen. Only the agent who has created their event can see their reviews and the admin. Agents also can not see each other reviews.

2. **Agent:** a person who publishes events

Agent types: there are 2 types of agents and there are only 2 differences between them.

1) organizer: has no members, association: has members. 2) organizer pays monthly

membership, association does not pay any monthly membership a % commission set by admin is cut from every membership each user pays.

- Login: Every agent has to log in to their account by entering their correct email and password that will match in the system database to be able to create events.
- Sign up: An agent account can be created by sending a request to the admin. The agent is required to provide the required information to prove legitimacy.
- Forgot password/reset password: If the agents are unable to log in to their account, they can choose the forgot password option. The system will send a code via email or sms which will include a code. After the agent enters this code, they can generate a new password to log in. If the agent wants to change their password, they can reset their password in user profile settings.
- Filter events: Agents can filter their events by date, location, sport type, full quota, and free options.
- Sorting events: Agents can sort the events by: most popular, old to new, new to old, cost low to high, cost high to low.
- Creating event: Agents can publish events by providing: the name of the event, date/s, time, place, participation fee, max number of attendees (optional), what the event is about, last registration date, etc.
- Created event options:
 1. Free event: all users
 2. Paid event: payment asked from all users
 3. Paid event: Payment only asked from users that are non-members of the agent that has created that event they want to participate in.
 4. Free event: only members of that agent (association) can apply
 5. Paid event: only members of that agent (association) can apply
- Viewing created events: agents can view their events as active, pending, cancelled(by agent/admin), completed, and drafts. These events can be edited anytime, but only when an active event is edited, the users in the participants list of that event will receive a notification that the event is updated. Agents can also see which events are added to favourites by how many users. When an event is completed an agent can check the reviews for feedback.
- Full events: If the quota set by an agent for that event is reached, new requests are automatically rejected.
- Displaying income: agents can display their income from each past event and total income from all past events by month.
- List of participants: Agents can view all the participants registered for their current and past events. They can also disallow users from participating in

certain events. When an agent removes a user from the participation list, they must define a reason, but this can only be seen by an admin; the user will only receive a notification that they are not allowed to participate in that event.

- List of attendance: The agents mark attendance manually or can take it by qr code.
- Get notifications: reminders about how much day left until the set event, event published successfully, membership is about to expire, new messages, system update, an event being deleted, an event being sent back into drafts, request being accepted to chat with admin, event quota is full, received warning. Agents can manage notification preferences.
- Sending messages: Agents can start a chat only with the users who are their members or their participants only, and admins if they face any issue related to the system. Agents can reply to any user who starts a chat, but can only initiate chats with their members or participants.
- Request to message with admin: Agents can send a request to chat with an admin.
- Dashboard: Total members, expiring soon members, current membership cost, commission cut from each membership, nearest upcoming event, last month membership and event status, live currency rates, graph of net monthly income, graph of income of that agent based on attendance of locations which can be also set to see the general income gathered total from all events based on locations.
- Agent membership: There are 2 types of portal membership: Organizer, association. The organizers are agents who publish events with no members. Therefore, they must pay a monthly membership fee to be an agent. Associations will be considered based on their member count. Dues are collected from each member of an association; the income is deducted according to the commission rate set by the admin, and the rest of the income is sent to the association monthly.
- Commission: A commission rate will be cut from each event's income. The same rate will apply to all events for an agent, but the rate may differ for each agent by an admin. The commission rate is deducted at the moment of payment.
- Commission rate request: agents can send a request to admin to change the commission rate set to them.
- Report: agents can report other agents, events, reviews, users to admin.
- View user page: agents can not see all of the users information unlike admin. They can only see the documents uploaded, the events the user attended only created by that agent and membership history.

- View agent page: Agents can see the about, events created by that agent, contact info, etc. On agent page.

3. **Admin:** a person who manages the system

- Login: Every admin has to log in to their account by entering their correct email and password that will match in the system database.
- Sign up: An admin account is created manually with authorization by the company.
- Filter events: Admins can filter events by date, location, sport type, full quota, and free options.
- Filter accounts: Admins can filter accounts by users, agents, female, male.
- Sort accounts: Admins can sort accounts by account new to old, account old to new, and number of warnings received.
- Approving/rejecting agent applications: admin/s check the information provided and make a decision.
- Removing agent authorities: admins are allowed to remove any agent if necessary.
- Viewing agents: admins can see how many events have been deleted from that agent by an admin, their active events, total number of events added into favourites by users, for how long each user has been their member, all members, the number of warnings they have received, the total number of events created, the exact date they became agents, which admin approved the request of the agent, the months they have paid the agent membership, commission rate cut from membership monthly, commission rate cut from events, and the number of cancellations of their membership.
- Viewing users: admins can see the user's name, surname, email, phone number, events they participated in, the name of agents they are members of, the date they opened the account, and reviews they have written.
- Deleting reviews and identifying spam: Admins can delete reviews. When a review is deleted the admin must give a reason that can be seen by other admins, and the user receives a notification as they have received a warning.
- Deleting event: Admins can view all active events, and if it seems fishy, they can delete them. With that action, the agent receives a notification as a warning; giving a reason for deletion is optional for the admin. The deleted events are sent into a section only visible to admins, providing information about the event description, the agent name, and which admin deleted the event.
- Sending an event into drafts of agent: If an admin notices that there is an issue with the event that has been published but is not necessary to be deleted. The event is sent back to the agent as a draft, provided with a reason.

- **Setting a commission:** The commission is set by default, which will apply to all agents, but admins are allowed to change the commission independently for each agent. The change of commission can also be seen by all admins, including when and by whom. There are two types of commissions to be set by admins. One is for the commission rate to be cut from each member of the agent, and the other is for the commission rate to be cut from each event.
- **Agent Income:** Admins can view the income each agent receives per event and by month.
- **System income:** Admins can view the monthly income received from commissions from each agent. Including event application price per event, commission cut from each event, monthly membership payment made to an agent, monthly membership commission rate cut, final membership payment to be transferred to the agent, final event payment to be transferred to the agent.
- **Messages:** Admins can send messages to any person in the system.
- **Ban system:** If a user or agent has received more than 3 warnings, admins are allowed to ban their account either temporarily or permanently.
- **View user:** admins can view all user information including events attended, when account created, their current and past memberships, transaction history, personal info, documents uploaded.
- **View agent:** admins can see all agent information which includes; agent information (the request page when the agent first applied), same info users can view when they open agent page but in addition events created as active, pending, cancelled, draft, cancelled.
- **Dashboard:** Admin can see number of total accounts (does not include inactive agent (organizer) accounts), number of active agents, number of active events, platform revenue, pending actions, live currency rates, graph of general income gathered total from all events based on locations in a year, last month income status from memberships and events.
